Work Experience

Tutor & Laboratory Assistant — Unipd

Sept. 2025 – Jun. 2026

- › Delivered optional tutoring sessions for undergraduate students in **Mathematical Analysis**, **Computer Systems I**, and **Data Structures and Programming**, guiding them through problem-solving exercises;
- › Served as laboratory assistant for **Computer Systems I** (Prof. Salmaso) and **Data Structures and Programming** (Prof. Menegatti and Zennaro): supported students with hands-on practical exercises.

Education

Master's Degree in Statistics — Unipd

Oct. 2024 – Expected Graduation: Sept. 2026

Key courses: Data Mining; Statistical Methods for High-Dimensional Data; Advanced Statistics; Advanced Computational Statistics; Statistical Models for Economic and Social Data; Stochastic Optimization; Bioinformatics and Biostatistics; Statistical Tools for Business Data Analysis.

Relevant academic projects – Ongoing (🌐 github.com/lucavarotto):

- › **Bio-Analytics: Growth Modelling of Cyanobacteria (Nostoc)**: Conducted statistical analysis of experimental data on biomass production. Investigated the influence of cultivation factors on biological growth monitored via optical density (OD);
- › **Vinted Market Intelligence – Web Scraping & Business Analytics**: Developed an automated data extraction pipeline from the Vinted platform using **web scraping** techniques and implemented **AI** models to perform business analytics.

Bachelor's Degree in Statistics for Technology and Science — Unipd

Oct. 2020 – Sept. 2024

Final grade: 107/110 | *Thesis:* Application of Classification Models in the Evaluation of Football Performance: Expected Goals and Expected Points.

Key courses: Statistical Models I-II; Applied Statistical Models; Multivariate Data Analysis; Statistical Methods for Big Data; Time Series; Databases; Information Retrieval.

Relevant academic projects (🌐 github.com/lucavarotto):

- › **Academic Classifier – NLP & AI on the University of Padua**: Performed **web scraping** of university websites, cleaned the collected data, and trained **AI** models to predict the school affiliation of each course from its textual description (NLP/classification);
- › **Next-Gen Search – BM25 Optimisation via Clustering and k-NN**: Designed an information retrieval architecture using a hybrid approach combining clustering and the k-NN algorithm.

Skills

Technologies R, Python, SQL, Microsoft Excel, Git/GitHub, AnyLogic

Hard Skills Statistica, Inferenza, Machine Learning, Data Science, IA, Scraping & Forecasting

Soft Skills Public speaking, Curiosità, Problem Solving
