Professional Profile

M.Sc. Statistical Sciences candidate at UniPD and **Adjunct Professor** at the Department of Economics and Management. I combine a solid background in **Machine Learning**, statistical modelling and programming (R, Python, SQL) with the ability to communicate complex results to non-technical audiences: I independently teach a Master's course in English and won the **Stat Data Camp 2026**. Seeking a **Data Scientist** or Data Analyst role where I can turn data into concrete business decisions.

Work Experience

Adjunct Professor — *Dept. of Economics and Management, UniPD* A.Y. 2026/2027

- Lecturer in charge of **Laboratory: Informatics** for the M.Sc. in **Management for Sustainable Firms**, taught entirely in **English** to **100+ students**;
- Teach Excel for business data analysis: formulas and lookup functions, data organisation and cleaning, charts and dashboards.

Teaching Assistant & Tutor — *UniPD* Sept. 2025 – Jun. 2026

- Tutor for undergraduate students and laboratory assistant: supported students through hands-on exercises and reinforced theoretical concepts.

Education

Master's Degree in Statistical Sciences — *UniPD* Oct. 2024 – Nov. 2026 (expected)

🏆 **Stat Data Camp 2026 – 1st place**: residential hackathon in Cortina sponsored by Geolander.it; analysis of complex datasets and presentation of strategic solutions to the **Municipality of Rimini**.

Bachelor's Degree in Statistics for Technologies and Sciences — *UniPD* Oct. 2020 – Sept. 2024

Final Grade: 107/110 | *Thesis: Application of Classification Models in the Evaluation of Football Performance: Expected Goals and Expected Points.*

Relevant Projects (github.com/lucavarotto)

- **Vinted Market Intelligence**: built an end-to-end web scraping pipeline integrated with AI models to extract and analyse business KPIs from the platform;
- **Next-Gen Search**: developed a hybrid Information Retrieval engine that improves the BM25 algorithm through clustering and k-NN;
- **Academic Classifier (NLP)**: built a dataset via web scraping and trained an NLP classifier mapping course descriptions to their academic departments;
- **Bio-Analytics (Nostoc)**: statistical modelling of experimental data to isolate the effect of cultivation factors on biomass growth.

Skills

Technologies	Python, R, SQL, Microsoft Excel (advanced), Git/GitHub, AnyLogic
Hard Skills	Machine Learning, Statistical Modelling & Inference, NLP, Time Series Analysis & Forecasting, Big Data, Web Scraping, Optimisation, AI
Soft Skills	Public Speaking, Communicating results to non-technical audiences
Languages	Italian (native), English (B2 – university teaching in English)

I consent to the processing of my personal data in accordance with Legislative Decree No. 196 of 30 June 2003 and the GDPR (EU Regulation 2016/679).
